Time allotted | 1hr | Agenda topic Topic | Presenter All

Discussion Conversation

Justin Michael – Environmental Scientist

Main Points from the conversation

Talked about:

What remediation of contaminated land may be like

How different chemicals and nutrients may move through different geological areas

How different soils hold or don't hold nutrients

How 3rd party monitoring may help insure protection of area

Re: Nitrogen, Potassium, Phosphorus:

Nutrient management (manure on land) show wetlands and susceptible areas, hold back surface spread,

How closely do they look at depth to surface water?

NPDES

Susceptibility Maps (soil type and depth to water) County has them. This area is highly susceptible.

Action items

Person responsible **Deadline**
